

Development Process Guidelines

Definition of Done

1. **Code Push:** All code must be pushed to the designated GitHub branch.
2. **Continuous Integration (CI):** The code must pass all CI tasks, including build, lint, and format checks.
3. **Team Demonstration:** Changes must be demonstrated to other team members.
4. **Product Owner Review:** Code must be reviewed and approved by the Product Owner.
5. **Main Branch Merge:** Upon approval, the code should be merged into the main branch.

Style Guide

1. **Formatting and Linting:**
 - Ensure the code adheres to Prettier formatting rules.
 - Follow ESLint linting rules.
2. **Naming Conventions:**
 - Use PascalCase for React component names.
 - Use kebab-case for CSS class names.
 - Use camelCase for other variables and functions.
3. **Styling:**
 - Prefer using CSS over inline styles.
4. **Code Cleanliness:**
 - Do not push any commented-out code to the repository.
