

POLYNOMIAL

Sprint 2 Plan

Goal: Establish basic project and task management functionalities.

User stories

- As a team member, I want a real-time overview of our project's status during group calls. (13 Points)

| Tasks | Expected Hours |
|-----------------------------------|----------------|
| Initial UI set up | 6 |
| Data Concatenation | 2 |
| Final data placement and UI setup | 3 |

- As a manager, I want to be able to add or remove team members from a project through the UI or through Discord roles. (2 Points)

| Tasks | Expected Hours |
|----------------------------------|----------------|
| Create the ability to edit tasks | 2 |
| Add the ability in the UI | 2 |

As a manager, I want to be able to create tasks to assign to other team members. (8 Points)

| Tasks | Expected Hours |
|-----------------------------------|----------------|
| Create tasks | 3 |
| Assign task to other team members | 2 |
